To Make Rainbows You Will Need: a flashlight or a sunny day. a mirror (at least 5" by 5") a pan of water. a CD. a prism (we used this one: Tedco Light Crystal Prism ?) some white paper. a small cue card. a tall, clear straight-sided glass of water. Instructions: Fill the glass almost to the top with water. If you are using sunlight, place the glass so that it is half on and half off the edge of a table, and so that the sun shines directly through the water, onto a sheet of white paper on the floor. Adjust the paper and the glass until a rainbow forms on the paper. How to Make a Rainbow. Isaac Newton is credited with being the first to show that white light is made up of all of the colors of the visible. Just pick one (or all) of these easy ways to wow the kids with your rainbow- making know-how. Steps. Fill the glass with water. Put the mirror into the water inside the glass at an angle. Position the glass so that sunlight shines directly at the mirror. You may have to shift the mirror to find the right angle. Look for a reflection on the wall. Adjust the angle of the mirror until you see a rainbow on the wall.

You usually have to wait until a storm has cleared and the sun comes out to see a rainbow, but you can make this rainbow inside your very own house.
